

Titan TM

Bike Frames

Our Titan  bike frames offer exceptional strength, durability, and lightweight design, making them a popular choice among cyclists.

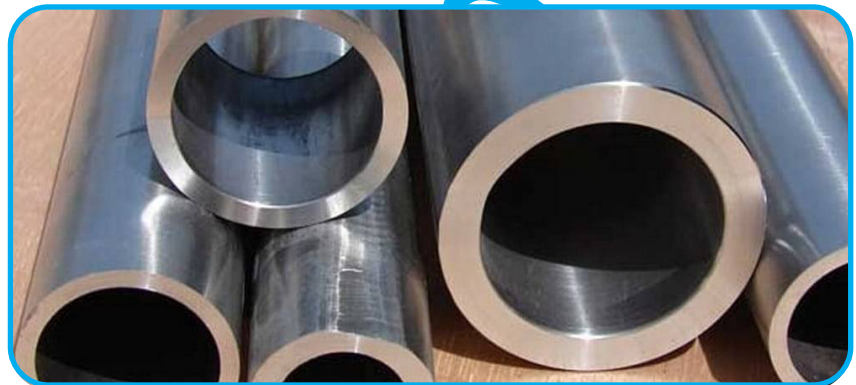

Made with Titanium grade 5, which is used for aircraft and spacecraft components, Titan  frame is more than ideal for a bicycle with weather-free characteristics.

1

Strength & Durability

Titan  frame is incredibly strong and resistant to corrosion, making it ideal for enduring harsh conditions.

Titanium Grade 5 prominent property is that it is entirely heat treatable, and can be used for temperatures up to 400oC.

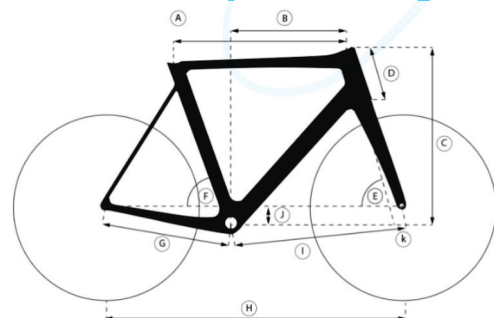

And that's used for Titan  bike frame!!!

2

Lightweight Design

Titan  frame is lighter than steel but stronger, resulting in a bike that is both efficient and responsive.

Size	48	50	52	54	56	58	60
	2 kg	2.15 kg	2.3 kg	2.45 kg

3

Price is up there with quality

Titan[®] frame is generally more expensive than aluminum or steel frames, but the strength and flexibilities it gives you are beyond your expectations.

4

Ride Comfort

Titan[®] frames offer a comfortable ride due to their inherent vibration dampening properties, whichever on a short or long faraway trip.

5

Maintenance

Titan[®] frames require minimal maintenance, as they are resistant to corrosion and wear. They will be your century companion at no doubt!

Titan-V Frames Price

Titan[®] offers a wide range of road frames from 48 to 60. A premium choice for cyclists seeking high performance, light weight, lifetime trouble-free companion, starting at \$1,500.00++. Customized laser engrave on frame is available on request.
